**RE: Upgrade to TDClient software from EasyAccess Client, new Initialization Files, & Release of SAIG Host Communication Guide for Mainframe and Midrange Users v2.0**

CPS/WAN Technical Support is pleased to announce the availability of TDClient software for MVS OS/390, OS/400, HPUX, AIX, and SUN Solaris platforms. New initialization files are available for the SAIG Mainframe/Midrange TDClient installation and a new release of the SAIG Host Communication Guide v2.0. You can request the TDClient software by calling CPS/WAN Technical Support at 800-330-5947.

**New TDCLIENT.INI Initialization Files:**

- The following parameter has been added to the INI file for use with TDClient:

EMAILADDRESS=CPSWAN@NCS.COM

Note: this parameter is required for TDClient but the email address is not used, so it is not necessary to change the email address that we provide.

- TDclient.ini in ASCII format is the initialization file for the following midrange systems:
  - ✓ HPUX
  - ✓ AIX
  - ✓ Sun Solaris

TDClient initialization files are now bundled with the TDClient installation file of the UNIX software.

- TDclient.ini in EBCDIC format is the initialization file for the following mainframe systems:
  - ✓ OS390 MVS
  - ✓ OS400

The initialization file can be downloaded from the web at [www.fsdownload.ed.gov](http://www.fsdownload.ed.gov) .

**Enhancements to TDClient version 2.2.x:**

- TDClient initialization files and the SECFILE are now bundled with the TDClient installation file of the UNIX software.
- Audit log and query list functionality.
- Enhanced error notification.

**Updates to SAIG Host Communication Guide for Mainframe/Midrange User's v2.0:**

- *Appendix E: TDClient.ini Defaults*, is a new section that lists each parameter in the initialization file and the defaults that we have set for use with SAIG TDClient.
- Installation instructions for UNIX clients have been upgraded with additional information.
- New parameters are available to use with the Query List and Audit Log commands.

**If You Need Further Information...**

You may reach CPS/WAN Technical Support Monday through Friday, 7:00 a.m.–7:00 p.m. (CT), at 800/330-5947. You may also e-mail inquiries, comments, or suggestions to **[cpswan@ncs.com](mailto:cpswan@ncs.com)**.
